TO: Minerals File
FROM: Tom Munson, Senior Reclamation Specialist *TM*
RE: Site Inspection, Levin Stone, Levin Stone #1, S/027/086, Millard County, Utah

Date of Inspection: March 21, 2001
Time of Inspection: 2:52 p.m.
Conditions: Sunny
Participants: Larry Garahana, BLM; Tom Munson, DOGM

Purpose of Inspection: To determine if the site has been reclaimed to bring the disturbance down to less than five acres in order to keep this as a small mine site.

We stopped at the stone yard, and no work has been done here to consolidate the area. We then stopped at the Sponge Gully Pit. No one was present at the site; however, there is a bulldozer here that I believe belongs to Dee Ferguson. It appears he has done a majority of the regrading, almost all of it. There may be a slight area that is not finished, it's hard to say. He said he had a days worth of work when I last talked to him, but it was supposed to be completed yesterday.

Photos were taken of the regrading work. Seeding remains to be done.
